

Location of Important Bird Areas that contain areas which qualify as Ramsar Sites in Angola

Designation progress

Areas within five Important Bird Areas qualify currently as Ramsar Sites in the People's Republic of Angola, of which none has been designated as yet.

Summary of Important Bird Areas that contain areas which qualify as Ramsar Sites in Angola

IBA code	IBA name	IBA area (ha)	Ramsar Site name	Ramsar Site area (ha)	Ramsar criteria			
					2	4	5	6
Ramsar designation of IBA lacking (5 IBAs)								
AO012	Iona National Park	1,592,000			●			
AO013	Lago Carumbo	150,000			●			
AO014	Luachimo River (Chitato)	2,000			●			
AO020	Mupa National Park	660,000			●			
AO022	Quiçama	996,000			●			
Grand total					5	-	-	-

For the full details of each site, including bird populations, see Fishpool and Evans (2001) and the Data Zone at www.birdlife.net by 2003. See 'Identifying potential Ramsar Sites' (p.11) for a description of the site- and species-selection procedure and the method for evaluating adequacy of Ramsar coverage that have been used in this report.

Threatened species

Within the five IBAs that contain areas that qualify as Ramsar Sites under Criterion 2, six wetland-dependent species of global conservation concern occur regularly in significant numbers.

Summary of the occurrence of wetland species of global conservation concern within the selected IBAs

Species name and global threat status
(IUCN 2000; see p.147)
