Global IUCN Red List Category —
Criteria —

Buteo buteo is a widespread breeder across most of Europe, which accounts for less than half of its global breeding range. Its European breeding population is large (>710,000 pairs), and increased between 1970–1990. Although there were declines in a few countries during 1990–2000, key populations in Russia, Germany and France were stable, and the species was stable or increased across most of the rest of Europe. Consequently, it is evaluated as Secure.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag.%	References
Albania	300 – 1,000	96-02	(-)	(0-19)
