Certhia familiaris is a widespread resident across much of Europe, which accounts for less than half of its global range. Its European breeding population is very large (>5,700,000 pairs), and was stable between 1970–1990. Although there were declines in a couple of countries during 1990–2000, populations across most of Europe were stable or increased, and the species remained stable overall. Consequently, it is evaluated as Secure.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag. %	References
Albania	(500 – 2,000)	02	?	–
