¹ D. Baldock, G. Beaufoy, G. Bennett and J. Clark, *Nature conservation and new directions in the CAP*, Institute for European Environmental Policy (IEEP), London, 1993.

² Semi-natural vegetation is naturally occurring (not planted) grass, scrub or woodland that is grazed and/or cut on a regular basis, resulting in a state that mimics natural habitats. See section below for more details.

³ Generally outputs on HNV farms are low and their remoteness of the market results in problematic returns. The market and the CAP are also insufficiently compensating HNV farmers for the public goods they provide. See G. Beaufoy and K. Marsden, 'CAP reform 2013: last chance to stop the decline of Europe's High Nature Value farming?', European Forum on Nature Conservation and Pastoralism, and The Royal Society for the Protection of Birds, pp.6-7, viewed on 10/06/2011, <http://www.efncp.org/download/policy-cap-reform-2013.pdf>
