

FOR REAL FOOD SECURITY WE NEED NATURE- FRIENDLY FARMING

Food security is often misunderstood.

In the past, we were afraid of not having enough food. So the EU started supporting intensive agriculture.

But today, we produce **FAR TOO MUCH**

88
MILLION
TONS OF FOOD
ARE
WASTED
IN THE EU
EVERY YEAR.

WE
EVEN
**BURN
FOOD**
FOR ENERGY:

60%
OF RAPESEED
PRODUCTION
IS USED AS
BIOFUEL

WE EAT
SO MUCH
MEAT AND DAIRY
IT'S RUINING
OUR HEALTH

**OVER
PRODUCTION**
HARMS FARMERS BY
CRASHING PRICES

**INTENSIVE
AGRICULTURE**
PUTS US AT RISK

IT HARMS NATURE AND
DESTROYS THE ECOSYSTEMS
WE NEED TO PRODUCE FOOD
IN THE LONG TERM.

WE MUST
TRANSITION TO
**NATURE-FRIENDLY
FARMING**

PROTECTING OUR PLANET PROTECTS OUR ABILITY
TO PRODUCE FOOD INTO THE FUTURE.

**REFORM
THE CAP**

THE EU'S COMMON
AGRICULTURAL POLICY
MUST SUPPORT ITS
FARMERS FOR
THE SUSTAINABLE
TRANSITION OF
OUR CONTINENT.
